

**Dept. of Public  
Works**

**To:** Residents of Idlewood Dr.

**From:** Village of Brockport Department of Public Works

**Date:** June 20th, 2018

The DPW will soon begin a rehab of your street. We will be first removing the concrete gutters along the edges and placing asphalt binder in their place. We will then begin installing a new Watermain. Once that main has been installed and Health Department tested we can switch over all the houses to that new main. We will abandon the old watermain in place. We are then planning on milling the street. After that process we will install new concrete curbs, pave the street and re-adjust driveway approaches. During this process we will try to be accommodating as much as possible to the homeowners that have to get in and out of their driveways.

If you have any questions or concerns please call the DPW office at 637-1060, Monday – Friday 7:00am - 3:30pm.

Thank You,

Harry Donahue

Supt. of Public Works
