

NOTICE: Soil Sampling Work in Your Area

Please be aware that the NYS Canal Corporation, through its engineering consultant AECOM, will perform soil sample borings at the following dams in your area during late October and early November:

Fairport Spillway (Town of Perinton/Village of Fairport)

Bushnell's Basin Sluice Gate (Pittsford)

Cartersville Spillway (Town of Brighton)

Spencerport Waste Weir Dam (Spencerport)

Brockport Waste Weir Dam (Brockport)

You may notice crew members, wearing hard hats and high-visibility vests, as well as drilling equipment called "rigs" in the vicinity. The crew will use drills to take samples of soil and rock as part of the Canal Corporation's routine asset inspection program. We will do our best to minimize any disruption to access of the nearby trail.

PLEASE NOTE THAT THIS ROUTINE SOIL SAMPLING WORK IS NOT A PART OF THE EARTHEN EMBANKMENT INTEGRITY PROGRAM. Minimal, small vegetation may be removed to aid in our inspection work.

Please direct any questions to Michael Sullivan, who can be reached at (518) 424-3447.
